

Radars and Aftermath

It is crucial to show extreme care to the poisonous intents and toxic thoughts that occasionally cross our minds. In fact, it is necessary to do so. Because there is a big RADAR in there that records everything and tickets violations accordingly. And an AFTERMATH known as the future is listening to us from a secluded corner and deciding accordingly.

Therefore, we must strengthen the mechanism of self-control (the inner brake system). It is necessary individual peace and social harmony.

It should not be forgotten that at the end of the day, we will pay the price according to the records of the RADAR and the decisions of the AFTERMATH.
